

Name: _____

STEGOSAURUS

This animal is a stegosaurus. Its name means “covered lizard,” referring to its bony plates, which line its back. The

stegosaurus lived mostly in North America, approximately 150 to 155 million years ago, during the Late Jurassic period.

The stegosaurus was a herbivorous quadruped. *Herbivorous* means that it was a herbivore, eating vegetation (plants) rather than meat (other animals). *Quadruped* means that it walked on four (*quad*) legs.
